WITH CAR PARKS
AND INCLINES

SAFELY TOW HEAVY BINS ON STEEP RAMPS

Most waste management in apartments and corporate buildings include the removal of waste bins from underground collection areas up to roadside for emptying.

With ramps being as steep as 15 degrees (1:4), this creates a manual handling concern when pushing 660 litre and 1100 litre waste bins.

A high risk of musculoskeletal injury and potential deterioration of bins cause damage to tenant's property. This should be a concern for all body corporates and building managers.

Electrodrive has a waste management solution that allows one person to safely tow waste bins with a battery powered tug up steep inclines (up to 14 degrees) with very little effort, while maintaining control of the bin.

POWERED TUG

TUG RISE

Designed to tow on slopes and ramps.
Ideal solution for moving 660 or 1100 litre bins
on ramps (such as basement car parks).

FEATURES

- Tow up to one tonne on a 15° incline.
- Turret with turret lock for easy reversing.
- Heavy duty high-traction wheels.

QUANTITY

TOWING ACCESSORIES

TOWABLE BIN HITCHES

Bolt-on tow hitch to suit 660 or 1100 litre bins
(one set per bin). Each set includes:

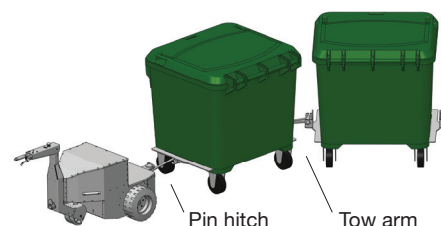

Pin hitch

Tow arm

FEATURES

- Allows bins to be towed hands-free.
- Can tow multiple bins in a daisy-chain formation (depending on weight and angle of slope).

QUANTITY (1 SET PER BIN)

Pin hitch

Tow arm

DIRECTIONAL LOCK TAB FOR STEERING

Required for safety purposes, directional lock tabs are fitted to your bin's existing rear swivel castors to enable controlled steering and towing in a straight line.

WARNING

Never tow with four swivel castors.

Towing bins with four swivel castors will cause problems with trailing and 'fishtailing'—cutting corners rather than following the unit.

FEATURES

- Improves steering and manoeuvrability.
- Enables towing of bins in a straight line.
- Fitted between castor plate and base of bin for reliability and safety.

QUANTITY (1 SET PER BIN)

FITTING

ON-SITE SERVICE

Our service agent **Serviced Equipment** can fit hitches and directional lock tabs to your existing bins on site.

FITTING

- Hitches.
- Directional lock tabs.
